

Thank you for the purchase of your new TransitWorks vehicle!

Your smart purchase ensures your passengers will be riding in the safest passenger transport vans on the road, and your drivers have access to innovative features which are simple to use and understand.

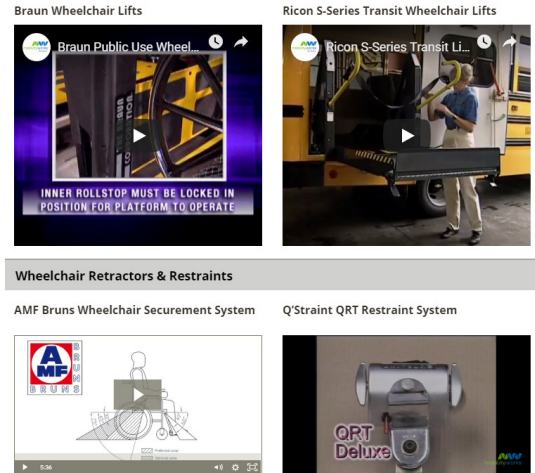

Safety and Training Videos are available on our website

There you can find:

- **Braun** and **Ricon** wheelchair lift instructions
- **AMF Bruns** and **Q'Straint** wheelchair securement training
- **Smartfloor** seating install and movement instructions
- Vehicle upfit information and More

Motor Housing on the side of the lift

Schedule Preventative Lift Maintenance

Having your lift in good working order not only maximizes efficiency and customer service, but helps avoid potential unplanned revenue loss for when a repair is required. Just know this – *if you don't maintain your lift, something will eventually stop working!*

Every 750 cycles your lift should be serviced by an **authorized Braun repair facility**. The cycle counter can be found on top of the motor housing on the side of your lift.

Call the TransitWorks Warranty Department at 844-872-6799 for help in locating a Braun repair facility near you

If Repair work needs to be done

Call TransitWorks Warranty first for authorization and referral to an authorized repair facility. They will ensure the fastest service and answer any repair or warranty coverage questions you may have.

TransitWorks Warranty Department – 844-872-6799

Visit www.transit-works.com/support/warranty-policy for more information on warranty coverage and details.

If you have any other questions, contact your TransitWorks Sales Representative, or send an email to biz@transit-works.com.

Welcome to the family!
